About This Game

The Quest is a beautifully hand-drawn open world role playing game with old school grid-based movement and turn based combat.

In the kingdom of Monares trouble is brewing. The governor of Freymore is missing and the island is in tumult. The mages all prophesy a dark shadow looming over the safety of the kingdom. As an Agent of the king, it's your job to find out what is happening and avert any danger.

Choose from five customizable races and an array of skills, weapons, armor and enchantments, and explore a huge world of four cities and a wilderness of mountains, caves, lakes and forests – full of mystery, magic and intriguing challenges. Meet the many inhabitants, each with its own agenda and attitude towards your character. Some will be helpful, some greedy or lascivious or just plain mean. You will have many choices, including some that may place you against the law, along your way to the dramatic ending of your own choosing.

Key Features:

- Pursue a long and dramatic main story and solve many optional side quests.
- Create a highly customizable character and cast dazzling spells, enchant powerful items, concoct potent potions and persuade people to further your goals.

-
- Discover an open world with interesting locales, day/night cycle, weather, fascinating people, dangerous creatures, readable books, pick-able locks, repairable items, houses that can be broken into, dungeons, traps and much more.
 - Play an absorbing card game with three different decks, accessible at the inns.

Title: The Quest
Genre: Adventure, Indie, RPG
Developer:
Redshift
Publisher:
Redshift
Release Date: 19 Feb, 2016

a09c17d780

I appreciate and enjoy how much detail is put into the individual quests in this game. I felt like I was living out an old school fantasy novel. The art style paired with the music captivated me fully. I was so engrossed in this beautiful fantasy world and really enjoyed my stay. Tons of fun to be had on this adventure and I really sunk my teeth into it! Excellent game.. This is a wonderful game. I wasn't really around when games of this kind were the next big thing in gaming, but my dad played Meridian 59 when it first came out, and I've been able to try out the fan server for Meridian that's still running today.

There's something really charming about those early attempts at 3D from the 90's, and more importantly there's something that was lost in the RPG genre that those games did very well- exploration. I'm not sure exactly what it is, maybe the scale of the game or no-hand-holding approach to questing that these old games had, but you really get the sense that any NPC you walk up to could really have something of value to say to you- maybe a quest, or a bit of gossip that tells you something important about other important characters in the area.

There's something that feels really good about the fact you can completely ignore the main quest and proceed to walk into town stealing things, that you can learn any spell or weapon art if you put in the time to train up your attributes and find the right items.

That's what was good about RPG's, and somehow gaming culture just completely misunderstood that and took the direction of using Diablo as the blueprint, where it was all just about the carnage, explosions, and action.

The Quest gives you a window into that old world of Roleplaying Games without all the clunkiness that old games would have were you to pick them up today- which is exactly what an old-school revival game should be.
